SATURN OVERVIEW

CYBERSECURITY SOLUTIONS

For over 35 years Saturn Business Systems has provided integrated information technology solutions to mid market and enterprise accounts. We partner with the leading global technology solution manufacturers and software providers to tailor and implement customized data center, cloud, big data & analytics and cybersecurity solutions. Our clients include the leading corporations and organizations in the Finance, Telecom, Retail and Healthcare space as well as companies and organizations in a variety of other industries.

For over 25 years Saturn has been delivering software based solutions focused in a variety of areas including Cybersecurity, Big Data & Analytics and traditional software defined infrastructure solutions. In this day and age, it seems that protecting a companies most prized asset, their data, is priority number one. With the advent of cybersecurity attacks, breaches and ransomware threats becoming more and more prevalent, Saturn, working in conjunction with IBM, have the right solutions to help protect our client’s business. With our senior Solution Architects and Account Executives, Saturn can assess your environment, make recommendations and implement the right solution to help you sleep better at night knowing your business is safe.

SATURN’S CYBERSECURITY PORTFOLIO

IBM QRadar

- ▶ Leverage analytics to collect and make sense massive amounts of real-time data flow, prioritizing events and detecting high-risk threat in real-time; “find the needle in the haystack
- ▶ Identify malicious use and exfiltration of critical data
- ▶ Leader in the Gartner Magic Quadrant since 2009 Security Information and Event Management (SIEM)

IBM BigFix

- ▶ Provides the fastest, most intelligent and comprehensive solution for finding, fixing, and securing endpoint issues in near real-time, regardless of OS, location or connectivity
- ▶ Provides continuous compliance and remediation of all endpoints in minutes with 98%+ first-pass success; roll out enterprise wide attack remediation in minutes / hours
- ▶ Audit authorized and unauthorized software; implement software patching, distribution and provisioning along with power management

Managed Security Service Provider

- ▶ We provision each customer with a subscription to the security platform and an option for collaborative cybersecurity operations
- ▶ We guarantee a service without any of the traditional service provider lock-in, and a penalty-free, smooth transition of all data and services to customer designated facilities at any time.
- ▶ Extend customer security teams with round-the-clock monitoring, incident response and full co-management of the most advanced security analytics and threat intelligence platform in use by the multinationals, enterprise, public sector and governmental organizations.

SATURN CYBERSECURITY CASE STUDIES

BigFix Implementation at a Well-Known Retailer

CUSTOMER CHALLENGES:

Limited staff leading to limitations in effective endpoint management; limited satisfaction with their existing endpoint management solution; lack of visibility into deployed software and hardware.

SATURN'S SOLUTION:

IBM BigFix Inventory; IBM BigFix Lifecycle Starter Kit.

THE RESULTS:

Using BigFix, Saturn and IBM were able to demonstrate production endpoints (including POS registers) that were missing critical security patches which were missed by a competitive endpoint management solution. The customer has been able to remediate this much faster than they did before. In addition, the customer has been able to lower software maintenance costs from discovering underdeployments and was also able to discover unauthorized software deployments.

BigFix Implementation at a Large Nationwide Insurance Company

CUSTOMER CHALLENGES:

Client was unable to provide governance and compliance reporting to the business on deployed software licenses; also sought a way to turn around new bare metal OS deployments faster.

SATURN'S SOLUTION:

IBM BigFix Inventory; IBM BigFix Lifecycle.

THE RESULTS:

Using BigFix Inventory, the customer was able to provide detailed information to the executive team on their software audit posture; Using BigFix Lifecycle, the customer was able to improve productivity through standardized and automated deployment of OS images to hardware.
